

Verified Requirements of the IAC Agencies which Cannot be Met by
Existing Facilities

A. USSE (nonscientific)

FIRST PRIORITY

1. Ministry Organization
Coverage of periodical and monographic literature for this subject.
2. Party and Government
Coverage of periodical and monographic literature on the subject.
3. Biographies
Increase in currency of coverage.
4. Military; Paramilitary; Civil Defense
Coverage of expanded volume of source material.
5. (Motor Vehicles
Coverage of periodical literature.)
6. (Communications Equipment and Instruments)
Coverage of periodical literature.
7. Arctic and Antarctic
Coverage of monographic literature.
8. (Radio Communications
Coverage of periodical and monographic literature.)
9. (Agriculture (crops)
Coverage of periodical literature.)
10. (Agriculture (livestock)
Coverage of periodical literature.)

C-O-N-F-I-D-E-N-T-I-A-L

USSR (pseudoscientific)

SECOND PRIORITY

1. (Higher Education
Coverage of monographic literature)
2. (Vocational education
Coverage of monographic literature)
3. (Collective Farm System
Coverage of monographic literature)
4. (Extractive, Production, and Power Machinery)
Coverage of periodical literature
5. Construction, Transportation, and Service Machinery
Coverage of periodical literature
6. Water Transport
~~Coverage~~ of maintenance of ships register of USSR merchant fleet
7. (Ferrous Metals
Coverage of monographic literature)
8. (Non-Ferrous Metals
Coverage of monographic literature)
9. (Chemicals
Coverage of monographic literature)
10. Biographic
Coverage of periodical literature

A. USSR (non-scientific)

THIRD PRIORITY

1. Propaganda Campaigns
Coverage of monographic literature

2. Crime
Coverage of Komsomol efforts to stamp out hooliganism and other crimes.

1st Priority
(?) 3. Legal system
Coverage of Organization of Judiciary, juridical theory

4. (Labor and Manpower
Coverage of periodical literature)

5. (Telephone and Telegraph Communications)
Coverage of monographic literature

6. (Postal Communications
Coverage of monographic literature)

7. (Non-Metallic Minerals
Coverage of monographic literature)

8. (Consumer Goods
Coverage of production of household utensils, furnishings, appliances, toys, luxury goods.)

9. Construction Materials
Coverage of Production of glass*, bricks*, cement*, and precast reinforced concrete products; facilities and equipment.

10. Geographic
Coverage of Area development, mapping programs, topography, hydrography

C. EASTERN EUROPEAN SATELLITES

FIRST PRIORITY

BULGARIA

1. * Organization of state organs directing the economy; national economic aggregates, e.g., budgets, planning figures, industrial production indexes, prices, productivity, total retail sales, profits of nationalized industry and subsidization.
2. ~~Individual coal mine or electric power plant capacities; plant fuel supplies; industrial reserves and resources.~~
3. (Statistics on production, consumption, prices, investments, and manpower in ferrous and non-ferrous metals industry; location and capacity of ferrous and non-ferrous metals installations in use, being constructed and planned.)

CZECHOSLOVAKIA

1. Organization and functions of the central ministries of the government.
2. * National economic aggregates, e.g., budgets, planning figures, industrial production indexes, prices productivity, total retail sales, profits of nationalized industry and subsidization.
3. (Individual coal mine or electric power plant capacities, plant fuel supplies, technological development in fuels and power; investments in coal mining and electric power facilities; fuel reserves and resources)
4. (Data on manufacturing industries to include: manpower figures, material input and product destination, production difficulties, prices and aggregate export figures.)
5. (Technology of ferrous and non-ferrous metals industry, shortages and controls in use of ferrous and non-ferrous metals, new technological developments in ferrous and non-ferrous metals industry.)
6. (Information on chemical industry to include: industry manpower aggregates, input data, technical difficulties, trade figures, prices, chemical standards.)
7. Mapping -- etc
8. Communications treaties

* See Tab B

HUNGARY

1. Organization and functions of the central ministries of the government.
2. * National economic aggregates, e.g., budgets, planning figures, industrial production indexes, price data, productivity, total retail sales, profits of nationalized industry, and subsidization.
3. (Data on the chemical industry, including industry manpower figures, input data, technical difficulties, trade figures, prices, chemical standards.)
4. (Distribution, allocation, and consumption of fuels and electric power; plant fuel supplies, technological developments in fuel and power; fuel reserves and resources; aggregate figures at industry level on input of all types of equipment and materials.)
5. (Information on manufacturing industries, except electronics industry and locomotive manufacture to include: annual production figures by industry; new products and technological developments; plant construction or expansion; manpower figures for any given industry; material input and product destination; production difficulties.)
6. (Location and capacity of ferrous and non-ferrous metals installations being constructed and planned; new technological developments in ferrous and non-ferrous metals industry.)
7. New rail lines and improvements and their significance; statistics on new railroad equipment and rolling stock; inland water transportation.
8. Mapping --- etc

POLAND

1. Organization and functions of the central ministries of the government.
2. * Budgets; gross national product; industrial production indexes; prices; productivity; total retail sales; profits of nationalized industry and their subsidization; foreign and domestic trade.
3. (Data on manufacturing industries to include: manpower figures; material input and product destination, production difficulties; prices and aggregate export figures.)
4. (Distribution, allocation, and consumption of fuels and electric power; plant fuel supplies; technological developments in fuel and power; fuel reserves and resources; aggregate figures at industry level on input of all types of equipment and materials.)

* See Tab B

D-D-N-F-I-D-E-N-T-I-A-L

POLAND (continued)

5. (Data on chemical industry including industry manpower aggregates; chemical trade figures; prices; information on chemical standards.)
 6. Information on rail and water transportation including: official statistical data on performance; rail and water transport facilities; statistics on new railroad equipment and rolling stock.
 7. (Population statistics; population movements; public health and sanitation.)
 8. Mapping --- etc.
- RUMANIA 9. Communications treaties ...

1. Organization and functions of the central ministries of the government.
2. (Budgets; gross national product; industrial production indexes; foreign and domestic trade.)
3. (Distribution (excepting petroleum pipeline transportation), allocation, and consumption of fuels and electric power; production of electric power; plant fuel supplies;)
4. (Data on the chemical industry to include: investments, manpower figures, technical developments and problems.)
5. (Location and capacities of ferrous and non-ferrous metals installations being constructed and planned; new technological developments in the ferrous and non-ferrous metals industry.)
6. Development of port facilities; operational efficiency of railroad transport.

YUGOSLAVIA

1. Development of port facilities and water transport; organization and administration of transportation; operational efficiency of railroad transport
2. Facilities for scientific and technical education.

EUROPEAN SATELLITES

SECOND PRIORITY

BULGARIA

1. (Legislation affecting agriculture; organization and administration of local agricultural units.)
2. (Data on manufacturing industries, except machine building industry, to include: annual production figures, new products and technological developments, plant construction or expansion aggregate manpower figures, material input and product destination, production difficulties, prices, and aggregate export figures.)
3. Postal and telecommunications facilities in service, being constructed, and planned, and inadequacies in facilities or service.
4. Total land under irrigation; summaries of meteorological data.

CZECHOSLOVAKIA

1. (Legislation affecting agriculture, organization and administration of local agricultural units, food processing industry.)
2. Data on construction and construction materials industry to include: construction methods and technology, aggregate figures on construction materials industry, materials shortages and substitutes, investment data, and production of individual cement factories.
3. (Data on consumer industries to include: aggregate figures on textile, footwear and other light industries, investment and budget information, manpower and equipment aggregates, consumption or availability of all light industry commodities, planned and actual retail and wholesale trade, statistical data on trends in the cost of living and real wages.)
4. Data on inland water transportation; new rail lines and rail line improvements and their significance; expansion of rail yards and stations.
5. Postal and telecommunications facilities in service or planned, and inadequacies in facilities or services; economic factors relative to communications services; e.g., prices, labor and investments.
6. (Analysis, heating value, physical characteristics of solid fuels; quarterly or monthly plan and plan fulfillment figures on electric power; rural electrification.)

BULGARY

1. Aggregate figures on the construction materials industry; new construction methods and technology; quantity and types of construction equipment; new materials, shortages of materials; investment data; production of individual cement factories.
2. (Data on consumer industries to include: aggregate figures on textile, footwear and other light industries; investment and budget information; manpower and equipment aggregates; consumption and availability of all light industry commodities.)
3. Inadequacies in postal and telecommunications facilities and service; economic factor relative to communications services; e.g., prices, labor and investments.

POLAND

1. (Legislation affecting agriculture; organization and administration of local agricultural units.)
2. Aggregate figures on the construction materials industry; new construction methods and technology; quantity and types of construction equipment; new materials, shortages of materials; investment data; production of individual cement factories.
3. (Data on consumer industries to include: aggregate figures on textile, footwear and other light industries; investment and budget information; manpower and equipment aggregates; consumption and availability of all light industry commodities.)
4. Inadequacies in postal and telecommunications facilities and service; economic factors relative to communications services; e.g., prices, labor and investments.
5. * Theory of price formation; theory of national income calculation; money and banking statistics; planning of employment; theory of wages; determination of foreign trade prices.
6. (Analysis, heating value, physical characteristics of solid fuels; quarterly or monthly plan and plan fulfillment figures on electric power; rural electrification; production of crude oil and petroleum products; pipeline transportation of crude oil and petroleum.)

*See Tab B

INDONESIA

1. (Technological developments in fuels and power industry; fuel reserves and resources; input of all types of equipment and materials.)
2. (Statistics on consumption, prices, investments, and manpower in the ferrous and non-ferrous metals industry.)
3. (Production problems in the manufacturing industries.)
4. (Information on consumer industries to include: aggregate figures on textiles, footwear, and other light industries; investments on industry level; manpower employed.)
5. Investment data on the construction materials industry; new materials and techniques.

EASTERN EUROPE SATELLITES

THIRD PRIORITY

HUNGARY

1. ~~Mapping programs, agencies, and personnel; territorial administrative division changes; adoption of Soviet mapping system.~~
2. * Theory of price formation, national income calculation, money and banking statistics, investments and sources of invested funds, theory of wages, and labor allocation, functional breakdown of labor force, labor union membership, standard of living, and training of labor force.
3. (Quarterly or monthly fuels and power plan and plan fulfillment figures; quality of products; price and cost data; developments in technology; rural electrification.)
4. (Data on consumer industries to include: aggregate figures on textile, footwear and other light industries investment and budget information, manpower and equipment aggregates, consumption or availability of all light industry commodities, planned and actual retail and wholesale trade, statistical data on trends in the cost of living and real wages.)

CZECHOSLOVAKIA

1. ~~Mapping programs agencies, and personnel; territorial administrative division changes; adoption of Soviet mapping system.~~
2. * Theory of price formation; theory of national income calculation, money and banking statistics; planning of employment; theory of wages; labor union membership.
3. (Investment in the chemical industry on a commodity basis; adoption and development of Soviet or Western technology; information on important chemical industry personnel.)
4. Standards in the construction industry; housing construction at key industrial installations.
5. (Technological developments in consumer and light industry.)
6. Developments in motor transport.
7. Legislation affecting communications; ~~communications treaties.~~

*
see tab B

HUNGARY

1. ~~Mapping programs, agencies, and personnel; adoption of Soviet mapping system.~~
2. * Theory of price formation; theory of national income calculation; money and banking statistics; planning of employment; theory of wages; determination of foreign trade prices.
3. Basic information on natural geographic and topographic features.
4. (Analysis, heating value, physical characteristics of solid fuels; quarterly or monthly plan and plan fulfillment figures on electric power; rural electrification.)
5. (Quarterly or monthly plan fulfillment figures for industry; collations of advertisements for industrial manpower; plant productivity drives; workers pledges.)
6. (Foreign trade in consumer goods; statistical data on trends in cost of living and real wages; technological developments or difficulties in consumer industry.)

POLAND

1. ~~Mapping programs, agencies, and personnel; territorial administrative division changes; adoption of Soviet mapping methods.~~
2. (Quarterly or monthly plan fulfillment figures for manufacturing industries; collations of advertisements for industrial manpower.)
3. (Adoption and development of Soviet or Western technology in chemical industry; information on important chemical industry personnel.)
4. Standards in construction industry; housing construction at key industrial installations.
5. (Technological developments in consumer and light industry; foreign trade in consumer goods; statistical data on cost of living and real wages; organization of retail and wholesale trade.)
6. Legislation affecting communications; ~~communications treaties.~~

*see Tab B

EAST GERMANY

1. (Data on the chemical industry to include: investments in the industry, new or expanded installations, new chemical and pharmaceutical products, production figures, industry manpower figures, and chemical trade figures.)

RUMANIA

1. * Efficiency of nationalized industry; money and banking statistics; price formation.
2. (Manpower figures for branches of manufacturing industry and for major individual plants; material input and product destination.)
3. (Input data, trade figures, prices, and technical standards in the chemical industry.)
4. Operational efficiency of communications facilities.
5. (Consumption or availability of all light industry commodities; statistical data on trends in the cost of living and real wages.)
6. Housing construction at key points; quantity and types of construction equipment.
7. ~~Mapping programs, agencies, and personnel; territorial-administrative division changes; adoption of Soviet mapping methods.~~

YUGOSLAVIA

1. Legislation affecting agriculture; total land under irrigation; organization and administration of local agricultural units.
2. (Chemical industry adoption and development of Western production methods; biographic data on important chemical industry personnel.)
3. (Consumption or availability of all light industry commodities; statistical data on trends in the cost of living and real wages.)
4. Mapping programs, agencies, personnel; territorial administrative division changes; city development in connection with important industrial installations.
